Providing durability and water resistance.

**INTUITIVE ONE-HAND USAGE**  
Improves operation speed in ski rentals and depots.

**Dry it. Store it. Use it.**

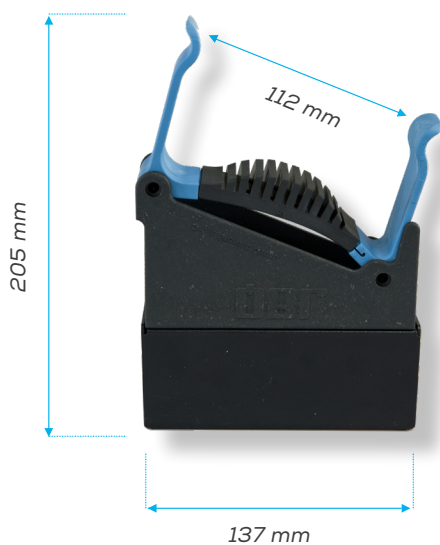

# The CliQ holder has been designed to maximise the storage functionality of your skis.

Its uniqueness lies in its effective combination of several key features: secure hold on equipment, exceptional ease of use, the possibility of storing different types, lengths and widths of skis, and a very impressive presentation. The innovative design and the patented operating mechanism of the holder allow you to insert your skis intuitively and quickly – with just one hand. Slight pressing of the rubber-coated spring plate mechanically closes the arms, which stiffen the skis in the holder extremely firmly and securely. The skis are stored at an angle of 22° to the wall, which gives them an attractive display.
